Abdelrahman Mohamed Abdelwahab
Full Stack .Net Developer

Mobile: 01067123259 **Email:** abdelrahmaan1998@gmail.com **Address:** Cairo – Egypt

LinkedIn GitHub

A fresh software engineer who graduated from Ain Shams University with a strong academic background and completed the Route academy full-stack diploma. Aware of algorithms, data structures, and writing clean code and have a desire to learn new things.

Education:

YEAR: 2016-2020

Bachelor's degree in computer and information science
Scientific Computing department
Ain Shams university

Courses:

Jun 2021 – Mar 2022

Full-Stack web development using .Net and Angular at **Route Academy.**

Projects:

Movie Recommendation System
Graduation project
A movie recommendation system, are a collaborative filtering (CF) and Content-based Filtering (CBF) approaches to filtering or predicting the users' film preferences based on their past choices and behavior
Using: Python, Tensor-Flow (TF), Machine Learning (ML).

Company Dashboard
Dashboard handle employees and their departments data
Using: ASP.Net Core (MVC), Entity Framework Core, C#, SQL Server, AJAX.

Book Store (Code)
Book store website that has 5 pages (home, blog, events, contact, cart) and you can get all details for a book. And can search for a book using the book name.
Using: Angular, Google-API, TypeScript, HTML, CSS, Bootstrap, swiper.js.

Sticky Notes Website (Live Demo)
The user can apply CRUD operations on his tasks if he was authorized.
Using: Angular, Route-api, jQuery, Bootstrap.

Check weather application (Code) (Live Demo)
A website that takes a location from the user and gives the weather information in this location using weather api.
Using: JavaScript (JS), HTML, CSS, Bootstrap.

Ecommerce Website (Code) (Live Demo)
Using: HTML, CSS, JS, Bootstrap.

Predict Movies success
Predict the rate for each movie using machine learning models.

Skills:

Programming Languages: C/C++, C#, Python, JavaScript.
Dot Net Technologies: Framework 6 & Core, LINQ, Entity Framework, ASP.Net Core MVC, ASP .Net Web API, ASP .Net SignalR.
Frontend Framework, Libraries: HTML, CSS, JavaScript (JS), ES6, Sass, jQuery, Bootstrap, Angular.
Dev Tools: Git, Visual Studio, Visual Studio Code, postman, SSMS
General Concepts: Agile, Object-Oriented Programming (OOP),
Design Principles and Patterns, Data Structures, And Algorithms.
Personal Skills: hard worker, team player, have a desire to learn new things.
